

The Nulec range of Automatic Line Reclosers has been well established within the ESB over the past few years.

To further enhance the level of technical support and service backup on the Nulec product range to the ESB, Renley has established a new Technical Support Centre at our Ballymount, Dublin offices.

From here we provide direct and telephone support to assist in the smooth operation of the Nulec product range.

Renley provides an extensive range of service and support, from administration of ESB orders into Nulec to full technical support and training on the product.

Specific areas of Technical Support include:

- Software - installation and training
- WSOS – installation and training
- Technical training on product, product installation and service procedures
- SCEM changes
- CAPM Card changes
- Umbilical Cord - supply and repairs
- Communication cables
- Battery Maintenance programs
- General product support

# NU.LEC Technical Support

Renley will also be holding stock of spares and equipment to assist in the fast repair and maintenance of Nulec Reclosers.

The new service is managed by John Carolan, Marketing Manager at Renley. Please feel free to contact us at any time should you have any service, repair, training or technical support enquiry.
